Objective

A detail-oriented Computer Science graduate passionate about building high-quality, interactive user experiences. Eager to apply strong skills in JavaScript, HTML, and CSS to translate Figma designs into flexible, reusable components using modern frameworks like React and Next.js. My backend internship experience at iDara.NET has provided me with a solid understanding of full-stack development and writing clean, maintainable code within a collaborative team environment.

Awards

Second Winner in Smart Makkah Hackathon
